## The Council On Foreign Relations

In 1921, J.P. Morgan, Max Warburg and John D. Rockefeller, established the Council on Foreign Relations, whose purpose right from its conception was to destroy the freedom and independence of the United States, and to lead the country into a one-world government.

This primary front organization allows them to control the heads of virtually every industrial empire in America and every federal agency; who provide the money and the influence to elect the CFR chosen U.S. Presidents, Congressmen and Senators; and who decide the appointments of Secretaries of State, and of the Treasury.

This is how the elite control the U.S. to promote policies that further their agenda. There is no difference between Republican and Democrat, since they both work for the same global goal of a one-world government, one-world financial system and one-world religion.

There are over 3,000 CFR members. As you read the list, keep in mind that all of these people work for the elite's goals, not for the good of the U.S., and then you will understand why we keep accumulating debt, getting in more wars, and are losing our freedoms.. and why you're not getting the truth through the mainstream media.
